

Katherine, Graves' disease; Jack, cochlear implant and bacterial meningitis; Katie, general pediatrics; Haley, asthma; Jack, heart defect; Dawson, diabetes; and Blake, pneumonia.

Sometimes a little smile is the best medicine of all.

University of Missouri Children's Hospital is the only hospital in mid-Missouri dedicated to kids. Just kids.

Our physicians represent more than 35 pediatric specialties, treating everything from asthma to vasculitis.

We teach kids to understand their illness or injury, manage them and get back to just being a kid.

For more information or to make an appointment with a Children's Hospital physician, please call (573) 882-7500.

We know kids.
