

The Great Surgical Coverup

Under that Band-Aid, there are no major incisions. Just a few small punctures are all we need to cover. There is less pain and less time in the hospital. University Hospital has the largest and most experienced staff of minimally invasive surgeons in mid-Missouri. They perform more than 50 different laparoscopic procedures.

At University Hospital, we take minimal to the max.

Ask your doctor about scheduling your surgery with a member of our minimally invasive surgery team. For more information, please call (573) 882-1MIS or log on to our Web site at mis.muhealth.org.
