

IMMUNIZATION Schedule

Immunizations are vital to your child's health. They not only protect your child from deadly diseases like meningitis, measles, chickenpox, whooping cough, flu and others, but they also protect other children your child comes into contact with. We follow the vaccination schedule recommended by the American Academy of Pediatrics (AAP) and the Centers for Disease Control (CDC).

2 mos.	Pediarix • Prevnar 13 • HIB • Rotavirus
4 mos.	Pediarix • Prevnar 13 • HIB • Rotavirus
6 mos.	Pediarix • Prevnar 13
9 mos.	No vaccines required unless behind schedule.
12 mos.	MMR • Varicella • Hepatitis A
15 mos.	DTap • Prevnar 13 • HIB
18 mos.	Hepatitis A
4-6 yrs.	Kinrix • Proquad
11 yrs.	TDap • Menactra • HPV #1 <i>(Dose #2 of HPV is due 6 months after the first dose.)</i>
16 yrs.	Menactra

**Pediarix (Dtap + Hepatitis B + Polio) • Kinrix (Dtap + Polio)
Proquad (MMR + Varicella)*

Flu Vaccinations are recommended each year beginning in September or October.

Track and print your child's immunization recording in **HEALTHConnect**.
