Health Information Exchange allows your health information to be shared among physicians, hospitals and other health care providers:

- Gives providers immediate access to important health information necessary to treat you, such as illness or injuries that you may have (like diabetes or a broken bone), your medical history (including hospitalizations), test results (like X-rays or blood tests), immunizations, and medicines you are taking or have taken
- Reduces need for duplicate tests and treatments
- Reduces chance of dangerous medication errors

No action is required on your part to be part of the Health Information Exchange.

If you choose not to participate, please contact any of our MU Health Care clinics, hospitals or medical records at (573) 882-8911.
